Country	Korea
Agency	Department of State
DoS Office	N/A
Post	SEOUL
Section	ECON
Number of Interns	1

### **Project Description**

The Republic of Korea's (ROK) global prominence continues to rise with its leadership role as the 13th largest economy (according to the IMF) as well as being globally active on nuclear security, international assistance, foreign investment, space and aviation, climate change, information communication and technology. With the interconnectedness of the ROK to international community and the global economy, the ROK is sensitive to external events in these areas. U.S. Embassy Seoul is looking for a Virtual Student eIntern to help assess the impact of these forces on the ROK. U.S. Embassy Seoul's Economic Section will coordinate with the eIntern on goals and objectives, and it will specify benchmarks and timelines for the project. The eIntern will search through all available media, including official ROK government websites, non-governmental websites, universities, think tanks, and media on any information, which would impact the ROK, whether it is a regional or global development. The eIntern will also assess the impact of these activities on the ROK.
